

Capture Stats

See a summary of the results of your scan, which include:

Relevant Files - Files that do not contain Trivial or Duplicate Files.

Trivial Files - System generated files that are automatically considered trivial.

Duplicates - Copies of original files.

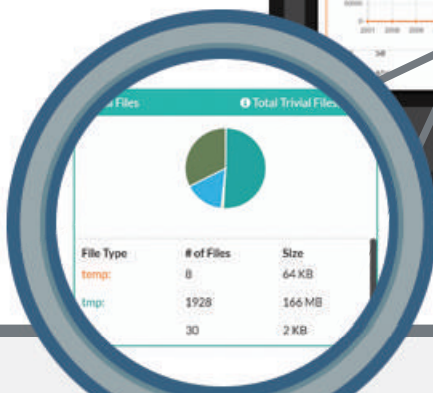

Duplicates

Get a breakdown of unique, original, and duplicate files.

Unique Files - Files that have no duplicates, or have never been copied.

Original Files - The original version of the file, based on the file creation date.

Duplicate Files - Exact duplicates of files.

Trivial Files

Displays your files that are considered trivial, including:

System generated ROT - Redundant, Obsolete and Trivial files.

Common Trivial Files - Such as thumbs.db, shortcuts, temp files, and 0 byte files.

File Breakdown

See a breakdown of your files in a number of ways including:

Files by Year & Growth over Time - The unique files that have been created by year.

Files by Age - How old your unique files are, helping you to decide what's still relevant.

Files by Type & Age - The size of your unique files, and the top 10 file types.
